

Interactive Form Instructions

What type of habitat does your suggested opportunity relate to?*

An opportunity refers to an area where nature should be improved

The diagram illustrates the process of selecting a habitat type in a form. It shows a dropdown menu with options like "Other (please state)", "Standing water", "Reedbeds", "Coastal and floodplain grazing marsh", and "Other (please state)". A red circle with the number "1" is next to the top "Other (please state)" option. An arrow points from this option to a text box containing "Other (please state)". Another red circle with the number "2" is next to a text box containing "Hedgerows", which is also highlighted with a red border.

Selecting a habitat type: 1. We strongly encourage selecting one of the existing habitat types listed within the drop-down box

2. If the specific habitat type you require is not listed, scroll to the bottom of the drop-down menu and select "Other (please state)" and provide further details within the manual type box

Adding your site to the interactive map

Drawing a polygon

Drawing a polygon:

1. Drag mouse and single click to drop additional points

2. Continue along entire shape of area

3. Double click on final point or select the finish button to complete drawing your polygon
