Biodiversity Evidence Better Outcomes from Planning

EXTERNAL RESOURCES COMPILATION

External resources compilation

In this document we have compiled resources and useful webpages on various aspects related to biodiversity and planning. This resource is primarily for London's planners and aims to have in one place the information they might need when looking into biodiversity matters in development management but also strategic planning. There are several ways to look for the required information, such as based on topic (from the quick links below) or keywords. Resources for each category are sorted based on the year of publication.

At the end of this document there is a compilation of London's <u>Species</u> and <u>Habitat</u> Action Plans. These were prepared by the London Biodiversity Partnership, mostly in the early to mid-2000s, and though they could be a useful resource they may contain some outdated information.

This is part of a series of resources prepared by the "<u>Biodiversity Evidence – Better Outcomes from Planning</u>" project aiming to support London's Local Planning Authorities to achieve better outcomes for biodiversity through planning. The project is hosted by Greenspace Information for Greater London CIC and supported by the Mayor of London.

Abbreviations

ALGE: Association of Local Government Ecologists

BCT: Bat Conservation Trust

CEH: Centre for Ecology and Hydrology

CIEEM: Chartered Institute of Ecology and Environmental Management CIRIA: Construction Industry Research and Information Association

DEFRA: Department for Environment Food & Rural Affairs GiGL: Greenspace Information for Greater London CIC

IEMA: Institute of Environmental Management and Assessment

ILP: Institution of Lighting Professionals

JNCC: Joint Nature Conservation Committee

LNHS: London Natural History Society

PTES: People's Trust for Endangered Species RSPB: Royal Society for the Protection of Birds

RTPI: Royal Town Planning Institute ZSL: Zoological Society of London
