

Meeting Summary

London Wildlife Sites Board (LWSB)

14th September 2026

Full meeting minutes are available on request.

1. Clarifications on previous meeting minutes

No comments or questions were raised over the previous meeting minutes. An update following the submission and discussion of Greenwich's SINC review at the last meeting was given.

2. LB Barnet SINC Review

The Board reviewed Barnet's SINC survey and provided recommendations. The Board raised concerns over the lack of a Local Sites Panel and the stage at which the review was brought to the Board. However, they were otherwise happy with the process followed and felt the review was thorough.

3. City of London SINC clustering

The City of London and their consultant, LUC, sought the advice of the Board around clustering nearby SINC's / separate parcels of SINC's as a whole. Feedback was given and it was agreed that connected parcels should be assessed as a whole.

4. Terms of Reference

The Terms of Reference were discussed with a plan proposed to review membership roles and terms going forward.

5. AoB

Updates were given on LB Richmond Upon Thames SINC review and the Royal Society of Wildlife Trust's national Local Wildlife Sites Review project.

The impacts of development pressure and increasing visitor numbers were discussed, as well as a planning query regarding a linear site in Harrow.

The next LWSB meeting will be held in December 2026.
